DATASTAGE – JOB EXPORT INSTRUCTIONS

The DataStage jobs can be exported at project level or at a job level using the dsexport.exe utility from the client machine where DS clients are installed.
General syntax of dsxport.exe command utility.

```
dsexport.exe /AF=authfile |
/URL=domainURL /H=hostname [/U=username [/P=password]] |
/D=domain /H=hostname [/U=username [/P=password]]
/JOB=jobname
/XML /EXT /EXEC /APPEND /NODEPENDENTS
project pathname1
```

1) **Project export from command line (Preferred)**

```
dsexport.exe /D=domain:9443 /H=R101 /U=billg /P=paddock
dstage2 C:\temp\dstage2.dsx
```

This command can be executed from the command prompt to export all **sequence/parallel/server** jobs with in a project as a single file.

dstage2 – Project Name

2) **Individual Job export from command line (To be Used only in special cases when required)**

```
dsexport.exe /D=domain:9443 /H=R101 /U=billg /P=password /JOB=par_Get_customer dstage2 /NODEPENDENTS  C:\temp\par_Get_customer.dsx
```

This command can be executed from the command prompt to export all individual jobs with in a project as a single dsx file.
It can be used to export **Sequence/parallel/server jobs** without executables.
/NODEPENDENTS – All job export without any dependencies.

Note: This is just an additional information. Individual job export will not be required when the whole project is exported.
